One stop for your plastic needs

Flexo/Gravure Printing

Flexo Printing Employs An Efficient Technology That Involves Creating An Image In Relief On Polymer Image Carriers Such As Plates And Sleeves. These Are Wrapped Around The Cylinders, And The Ink Is Transferred From A Pan To The Plate Through An Anilox Roll.

We have Flexo Printing and Gravure Prinitng Machines from 1 Colour to 10 Colour with All New Technology And The Ability Of High Speed Printing.

Injection Molding

Injection Molding Is A Method To Obtain Molded Products By Injecting Plastic Materials Molten By Heat Into A Mold, And Then Cooling And Solidifying Them. The Method Is Suitable For The Mass Production Of Products With Complicated Shapes, And Takes A Large Part In The Area Of Plastic Processing.

Currently we have Injection Molding with the Tonnage of 50T To 1500T. All the Injection Molding Machine we trade are Branded Injection Molding Machines

Blow Molding Machine

Blow Molding Is A Molding Process Used In The Manufacturing Industry To Create Hollow Objects Made Of Plastic. Like Other Molding Processes, It Involves The Use Of Heated, Liquid Material That's Forced Into A Mold Cavity Under Pressure.

We currently have machine stock which can make bottles of 50ml to 20L

Pelletizing/ Recycle Machine

Plastic Recycling it is the process of recovery of plastic waste and reprocessing them to create products that are functional and useful. The goal of plastic recycling is to eliminate plastic pollution by taking out plastics from the ocean and landfills as well as conserve resources in the process
